Kinetics is a process and mechanical contractor, specializing in the design and installation of process, mechanical, plumbing, and HVAC systems. Latsis Symposium. Meeting of Martin's 60 th Overview. The group "Molecular Kinetics and Spectroscopy" of Martin Quack at ETH has as main research theme the understanding of fundamental physical-chemical molecular primary processes. Activities. Use prepared index cards for this "Balancing Chemical Equations Activity." Use the "Classic Chembalancer" to balance the equations on this worksheet. In physics and engineering, kinetics is the branch of classical mechanics that is concerned with the relationship between motion and its causes, specifically, forces and torques.
