Chemical kinetics, also known as reaction kinetics, is the study of rates of chemical processes. Chemical kinetics includes investigations of how different experimental conditions can influence the speed of a chemical reaction and yield information about the reaction's mechanism and transition states, as well as the construction of mathematical ...Catalysis (/ k ? ? t æ l ? s ? s /) is the process of increasing the rate of a chemical reaction by adding a substance known as a catalyst (/ ? k æ t ? l ? s t /), which is not consumed in the catalyzed reaction and can continue to act repeatedly. Admissions are open for Classroom Course ( 2020 - 21) GATE 2020 Coaching: We initiate GATE coaching program by developing or amplifying Basics Concepts of each subject followed by escalating problem practices, Test evaluation and Doubt sessions for further enhancements. by: Don W.
