

# Download How Much Is Google Stock

The data comes from financial website How Much, which looked at popular stocks in 2007 to find out how much a \$1,000 investment in each would be worth now. I think the stock is still cheap based on fundamental metrics and my FED+ model supports this notion. As of the time of writing, Google stock was trading at \$767 with a 52-week range of \$480 - \$770. Earlier this year, Warren Buffett and Charlie Munger told Berkshire Hathaway investors that passing on Google stock shortly after its initial public offering on August 19, 2004 was a mistake. How much is Google stock to take or not to take? Stock like roulette – today green, tomorrow red. You can seriously increase your capital after a while or, conversely, after a while your capital may decline.
