A shooting range, firing range or gun range is a specialized facility designed for firearms qualifications, training or practice. Some shooting ranges are operated by military or law enforcement agencies, though the majority of ranges are privately-owned and cater to recreational shooters. Chances are your love of guns and shooting isn't just confined to the range. It can bleed over into your other interests, and influences the movies and tv shows you watch as well as the books you read. There are shooting ranges in the United States open to the public, both indoor and outdoor. Either privately owned firearms or those rented from the shooting range may be used, depending on the range rules set by the owner. The great philosopher Yogi Berra once said, "90% of this game is 50% mental." I think that when it comes to free throw shooting, Yogi was underestimating the mental aspects.
