If you are new to Cakewalk products, you may want to start at Tutorial 1. main menu options ship's station academy training advanced tutorial appendices quick start tutorial 688(i) hunter/killer tm Passive sonar listens without transmitting. It is often employed in military settings, although it is also used in science applications, e.g., detecting fish for presence/absence studies in various aquatic environments - see also passive acoustics and passive radar. Il sonar, termine che nasce come acronimo dell'espressione inglese sound navigation and ranging, è una tecnica che utilizza la propagazione del suono (sott'acqua in genere) per la navigazione, comunicazione o per rilevare la presenza e la posizione di imbarcazioni.
