Professor David Bishop elected to the National Academy of Engineering. Alex Sushkov and Liam Fitzpatrick featured in BU Today. g-2 Experiment named as one of the science stories likely to make headlines in 2019 by Science Mag

Physics is the study of the fundamental principles that govern the entire natural world, from the atomic nucleus and elementary particles to the dimensions of the universe and the search for dark energy. Our students investigate these principles in small classes with emphasis on lab experiences, and many opportunities for faculty-led research.

Professor of Physics, Jim Valles, has been awarded the Philip J. Bray Award for Excellence in Teaching in the Physical Sciences. The Faculty Teaching Excellence Awards recognize Brown faculty members for sustained and continued excellence in teaching.

Ein internationales Forscherteam hat mit dem Borexino-Experiment das Energiespektrum der Neutrinos aus der Sonne sehr genau vermessen. Die Ergebnisse erlauben einen tiefen Blick ins Innerste der Sonne.
