

Download Zirconium Isopropoxide

Packaging 10, 50 g in glass bottle Application Convenient precursor for the synthesis of olefin-functionalized zirconium-containing monomers, which have potential for the generation of hybrid zirconium-containing polymers. Application Electrolyte material for solid oxide fuel cells (SOFC). Collagen-yttria-stabilized amorphous zirconia hybrid scaffolds may be developed. TYTAN™, manufactured by Borica Co., Ltd. from Taiwan, is acknowledged as a leader in solvent borne adhesion promoters used in flexible packaging inks.
